PARAFON® STEP™
The time has come.

Paroc has teamed up with the architectural firm Bornstein Lyckefors to develop the PARAFON® Step™ concept, and we can now offer a varied and more attractive ceiling solution for suspended designs. If you do not have fittings that need to be hidden, you can of course still glue the panels directly against the ceiling.
PARAFON STEP is an acoustic ceiling solution that offers expansive opportunities to create attractive and unique interiors where the suspended ceiling not only serves as a neutral base, but also contributes to the decor of the room and enhances the overall experience.

The basic thinking behind the Step concept is simple. We work with acoustic tiles in various formats and with three different height options. The different heights and geometric forms provide countless possible combinations, while your choice of colour also gives you further possibilities to create your own unique acoustic ceiling.

PARAFON STEP is made from PAROC stone wool, an excellent material for sound absorption with the additional benefit of being completely non-combustible. In STEP we make use of the contrast between the natural rough structure of the stone wool on the acoustic tiles’ visible edges and the smooth surfaces, which further contributes to the dynamics and variation of the concept.

PARAFON STEP DIRECT is glued to the substrate and PARAFON STEP FOR GRIDS is made for mounting in suspended grids.
COLOURS 2018

PLANNING TOOL

Look for the PARAFON STEP Planning Tool on our web site.

Choose your pattern and colour in the Step Planning Tool and see the result in a three-dimensional view. Get the specification for the ceiling plan and the pattern details.

Enjoy working with PARAFON STEP!
Paroc is the leading manufacturer of energy-efficient insulation solutions in the Baltic area. The cornerstones of our business are customer and market orientation, continual innovation, profitable growth and sustainable development.

Under the PARAFON® brand we offer a wide range of acoustic panels, suspended ceilings and wall solutions to create pleasant working and living environments with good room acoustics. Under the PAROC® brand we offer a wide range of products and solutions for all traditional building insulation, technical insulation and marine insulation.

Our products are manufactured in Finland, Sweden, Lithuania, Poland and Russia. We have sales and representation offices in 14 countries across Europe.

We have protected Nordic homes, buildings and structures against harsh winters and extreme operating conditions using our red/white, sustainable solutions made of non-combustible stone wool for 80 years. Our vision is to be the best partner for sustainable construction and to offer products, solutions and support that helps our customers to make informed and sustainable choices. This is to create safe, energy-efficient and comfortable living and working environments for the future.
