ENVIRONMENTAL PRODUCT DECLARATION

Paroc Acoustics

Parafon Decibel Mass

Paroc AB

Parafon Decibel Mass
General information

**Product:**
Parafon products;
Decibel Mass

**Program operator:**
The Norwegian EPD Foundation
P.O. Box 5250 Majorstuen, N - 0303 Oslo, Norway
Phone: +47 ; 99*44*242
E-mail: post@epd-norge.no

**Declaration number:**
PGRF/3896/894/GP

**ECO Platform reference number:**

**This declaration is based on Product Category Rules:**
CEN Standard EN 15804 serves as core PCR
NPCR 010 rev1, Building Boards

**Statement of liability:**
The owner of the declaration shall be liable for the underlying information and evidence. EPD Norway shall not be liable with respect to manufacturer information, life cycle assessment data and evidences.

**Declared unit:**
1 m² of installed ceiling tile

**Declared unit with option:**
1 m² of installed ceiling tile

**Functional unit:**
1 m² of installed ceiling tile

**Verification:**
The CEN Norm EN 15804 serves as the core PCR. Independent verification of the declaration and data, according to ISO14025:2010

- [x] internal
- [ ] external

Third party verifier:

Martin Erlandsson, IVL
(Independent verifier approved by EPD Norway)

**Owner of the declaration:**
Paroc AB
Contact person: Josefina Johansson
Phone: +46 (0) 500 46 90 05
E-mail: josefina.johansson@paroc.com

**Manufacturer:**
Paroc AB, Akustik & Interiör
S - 541 89 Skövde
Phone: + 46 (0) 500 46 90 00
E-mail: paroc.se@paroc.com

**Place of production:**
Skövde, Sweden

**Management system:**
ISO 14001 and ISO 9001

**Organisation no:**
887294852

**Issue date:**
52030423:

**Valid to:**
520304245

**Year of study:**
2017

**Comparability:**
EPD of construction products may not be comparable if they not comply with EN 15804 and seen in a building context.

**The EPD has been worked out by:**
Josefina Johansson

Approved

Håkon Hauan
Managing Director of EPD-Norway

NEPD-1674-672-EN PARAFON Decibel Mass
**Product**

**Product description:**
PARAFON products are sound absorbing tiles and panels for suspended ceilings and free hanging applications. PARAFON Decibel products are also for sound insulation. The products core material are non combustible stone wool and facing material are pre painted glass fibre tissue. PARAFON products are intended for use indoor and are certified according to EN 13964 for Suspended Ceilings.

**Product specification:**
PARAFON product covered in this EPD are a multiple layer product for both sound reduction and sound absorption. Decibel Mass is a combined product with stone wool core and a sound insulating gypsum board on the back side. Visible glass fibre facing differ in thicknesses from 115-190 g/m2. The values declared in the EPD are based on product with thickest glass facing. The product thickness is 53 mm.

For more information, please visit:

**Market:**
Main market areas are the Nordic countries. The scenarios beyond cradle-to-gate are based on

**For more information; see Bibliography, page 7**

**Weight:** 5.04 kg
**Size:** 600x600x53 mm

**Reference service life, product:**
The reference service lifetime of Parafon Acoustic Ceiling Tiles is 50 years.

**Reference service life, building:**
The reference service lifetime of 50 years has been assumed for the building in all calculations.
LCA: Calculation rules

Declared unit:
1 m² of installed ceiling tile (thickness: 53 mm, weight per 1 m²: 14 kg)

System boundary:
Table below identifies the modules included in this study:
The production stage (module A1-A3) covers the following steps:
• Raw materials production (e.g. diabase, dolomite)
• Binder components production (e.g. resin)
• Transports of raw materials and pre-products to manufacturing plant
• Product manufacturing (power, thermal energy, auxiliaries, emissions)
• Production of packaging materials

Data quality:
The stone wool production data is site specific from PAROC plants Hässleholm and Hällekis in Sweden. The acoustics ceiling tiles are made of refined stone wool at PARAFON plant in Skövde, Sweden. Foreground data refer to the year 2015.

For life cycle modeling the GaBi ts Software System for Life Cycle Assessment, developed by thinkstep AG, is used (/GaBi ts 2016/). All relevant background datasets are taken from the GaBi ts software database. To ensure comparability of results in the LCA, the basic data of GaBi database were used for energy, transportation and auxiliary materials. The datasets are complete and conform to the system boundaries and the criteria for the exclusion of inputs and outputs. Background data refer to the years 2012 till 2015 (/GaBi ts 2016/) with a country specific scope as far as available, e.g. for raw material extraction and production, transportation, fuels and energy supply. All relevant processes (foreground and background) have been considered when modelling stone wool production. The process data and the used background data are consistent. The data quality can be qualified as good.

Cut-off criteria:
All major raw materials and all the essential energy is included. The production process for raw materials and energy flows that are included with very small amounts (<1%) are not included. This cut-off rule does not apply for hazardous materials and substances.

Allocation:
The allocation is made in accordance with the provisions of EN 15804. Incoming energy and water and waste production in-house is allocated equally among all products through mass allocation. Effects of primary production of recycled materials allocated to the main product in which the material was used. The recycling process and transportation of the material is allocated to this analysis.
**LCA: Scenarios and additional technical information**

The following information describe the scenarios in the different modules of the EPD.

### End of Life (C2, C3, C4)

Paroc maintains and offers its customers a used product take-back system called “Paroc Re-Wool” to enable the recycling of old stone wool/ acoustic boards.

As module A5 is not declared (including product installation and packaging disposal) and from module C4 (product disposal on landfill) no potential benefits arise module D is not declared.
LCA: Results

Life Cycle Impact Assessment results represent the environmental impacts for the life cycle of Parafon Acoustic Board from cradle to gate - with options.

* The product contain no substances from the Reach candidate list or the Norwegian priority list.

**** Transport from production site to central warehouse in Norway

Additional Norwegian requirements

Greenhouse gas emission from the use of electricity in the manufacturing phase

National production mix from import, low voltage (production of transmission lines, in addition to direct emissions and losses in grid) of applied electricity for the manufacturing process (A3).

Dangerous substances

- The product contains no substances given by the REACH Candidate list or the Norwegian priority list. The product is classified as hazardous waste (Avfallsforskiften, Annex III), see table.

- The product contains substances given by the REACH Candidate list or the Norwegian priority list that are less than 0.1 % by weight.

- The product contain dangerous substances, more then 0.1% by weight, given by the REACH Candidate List or the Norwegian Priority list, see table.

- The product contains no substances given by the REACH Candidate list or the Norwegian priority list. The product is classified as hazardous waste (Avfallsforskiften, Annex III), see table.

Dangerous substances

None of the following substances have been added to the product: Substances on the REACH Candidate list of substances of very high concern or substances on the Norwegian Priority list as of 03.09.2015 or substances that lead to the product being classified as hazardous waste. The chemical content of the product complies with regulatory levels as given in the Norwegian Product Regulations.

Transport

Transport from production site to central warehouse in Norway is: 245 km

Indoor environment

The product meets the requirements for low emissions (M1) according to EN 15251: 2007 Appendix E. PAROC stone wool products fulfill the most stringent requirement (M1) in the Finnish voluntary system for building material emissions developed by the Finnish Society of Indoor Air Quality and Climate in Finland. Our stone wool products are recognized as low emitting products, for which they have been tested since 1995. PAROC low emitting products are recognized by the M1 label.

Carbon footprint

Carbon footprint has not been worked out for the product.
