PAROC REWOOL bag holder (XTR 001)

PAROC REWOOL bag (XTS 001)

PAROC REWOOL bag holder (XTR 001) is an auxiliary tool belonging to the Paroc wool recycling system, REWOOL. The stand with wheels is made of galvanized steel. The stand is easy to move from one place to another as the insulation installation work progresses.

The clean pieces of Paroc stone wool are collected in the transparent **PAROC REWOOL bags** (XTS 001) made of Polyethylene. The bags and bag holder are sold separately. The transparent bag makes it easier to ensure the quality and purity of the fraction - no waste other than Paroc stone wool may be put in the bag.

Instructions for collecting pieces of wool are printed on the bag. The bag holds approx. 12 kg of LD stone wool fractions (volume 0.24 m³).

The collected fractions can be sent back to the Paroc factory in REWOOL bags.

APPROVALS:

N/A

APPLICATION:

Installation tools, stone wool insulation recycling

PACKAGE / STORING:

Carton
